L’ARTE DI FAR NASCERE LO STILE
Italian Gemstones is a gemstones’ cutting company born from his master gemcutter’s commitment and experience, Mr Franco Frassineti. His passion for this so peculiar art is doubtless a gift from nature, that appeared since he was very young. His working activity started when he was just eighteen and in this last thirty years has been fulfilled with one success after another. Franco Frassineti can be described as an artist and a creative at the same time and at his purest level, who could turn around the concept of cutting gemstones not only in Italy, but also in all the world. His innate curiosity and unquestionable taste for beauty led him to explore new creative routes that, through his long career, charmed and affected the major jewellery’s designers active in the worldwide market. In the past, he taught gemcutting at the Art Institute of Forli and some of his students distinguished themselves in the jewellery fashion industry. Now, Mr Frassineti decided to start anew next to young collaborators full of fresh desire to continue an art so peculiar and with such a mysterious appeal.
Tagli classici sfaccettati in topazio azzurro

Classic faceted cuts in blue topaz
Tagli classici vari in rutilato nero, rosso e giallo

Various classic cuts in black, red and yellow rutilated quartz
Pietre sfaccettate e cabochon in tormalina rubellite

Fascino, emozione e fantasia: questi sono i sentimenti che nascono dai tagli di pietre preziose, curati con passione e creatività da Franco Frassineti. Nella sua bottega artigiana le pietre allo stato grezzo vengono accuratamente selezionate e, solo utilizzando i “pezzi migliori”, prendono vita, grazie alla sua genialità, forme sempre nuove, che da oltre 35 anni hanno soddisfatto e in certi casi anche ispirato i designer di gioielli più famosi nel panorama mondiale.

Charm, emotion and fantasy: these are the feelings inspired by the cutted gemstones that Franco Frassineti realize with passion and creativity. In his artisan workshop, the rough stones are carefully selected and only the “best pieces”, thanks to his brilliance, become alive and each time take different shapes. This, for more that 35 years, have inspired the most famous designers of the worldwide market.
